

## **Cavert Wire – Critical Manufacturing**

March 24, 2020

As the progression of the Coronavirus (COVID-19) continues, the safety of our employees, customers and suppliers remain our utmost concern. We are committed to keeping everyone safe while we continue to serve our customers with prompt, uninterrupted service. At Cavert, we operate under a fully sustainable business model as we are the only baling wire company that manufactures its products from raw steel which is domestically sourced. Our business model reassures our customers that under the global conditions we face today, they can continue to rely on our trusted products and service they have come to expect.

Cavert's products are essential to customers that either operate in or supply products to multiple business sectors identified by the [Memorandum on Identification of Essential Critical Infrastructure Workers During COVID-19 Response](#) from the US Department of Homeland Security, Cybersecurity & Infrastructure Security Agency (CISA). Accordingly, Cavert is designated as an Essential Business under the Critical Manufacturing sector of this memorandum. Without the continued production and delivery of Cavert's products, the country could experience widespread disruptions to the supply chains of these critical business sectors.

These are extraordinary times that our company, our country and the world faces today. Cavert is as committed as ever to our employees and customers during these uncertain times because we understand the critical role that we play in sustaining and protecting the most critical supply chains our country needs today.

We would like to thank you for partnering with us and continuing your confidence in Cavert. The Coronavirus has already impacted many lives and will impact even more in the weeks and months to come. However, we plan to continue our operations and provide our products and services to our customers with a much greater determination.

We will provide updates as the situation continues to progress.

Sincerely,

Chuck Spittler

Chief Executive Officer
